Response in JSON (one domain) (decoded in array)

```
Array
(
    [errors] => Array()
    [result] => success
    [apireponse] => Array
        (
            [my-domain-example.com] => Array
                (
                    [domain] my-domain-example.com
                    [tld] => .com
                    [sld] => example2asdfs
                    [status] => available
                    [whois] =>
                    [error] => ERROR_DESCRIPTION_IF_STATUS_IS_ERROR
                )
            )
        [timestamp] => 1432027162.34
        [requests] => 2
    )
)
```

Response in JSON (one domain with multiple tlds) (decoded in array)

```
Array
(
    [errors] => Array()
    [result] => success
    [apireponse] => Array
        (
            [google.com] => Array
                (
                    [domain] => google.com
                    [tld] => .com
                )
            )
        )
    )
)
```

EXAMPLE OF WHITE LABEL DOCUMENTATION

```
[sld] => google
[status] => unavailable
[whois] => HTML_WHOIS_INFO_ENCODED
[error] => ERROR_DESCRIPTION_IF_STATUS_IS_ERROR
)

[google.eu] => Array
(
    [domain] => google.eu
    [tld] => .eu
    [sld] => google
    [status] => unavailable
    [whois] => HTML_WHOIS_INFO_ENCODED
    [error] => ERROR_DESCRIPTION_IF_STATUS_IS_ERROR
)

)

[timestamp] => 1432027243.83
[requests] => 1
)
```

Domain Statuses: available|unavailable|error

Error Occurred before API execution

```
Array
(
    [errors] => Array
        (
            [invalidkey] => Invalid API Key
        )

    [result] => failed
    [apiresponse] => Array
        (
        )

    [timestamp] => 1432027369.73
)
```

4 Errors:
